**ZENworks Desktop Management Agent - InstallShield Wizard**

**Novell Application Launcher settings**

Windows startup options

Startup Settings  
Application Explorer and Application Window display application icons in a standalone desktop window.

Application Explorer also integrates with Windows Explorer to show icons on the desktop, the Start menu, the system tray, and the Quick Launch tool bar.

This installation program creates shortcuts for Application Window and Application Explorer in Start > Program Files > ZENworks Desktop Management.

You can also choose to launch Application Explorer or Application Window when the workstation starts.

- Launch Application Explorer when Windows starts.
- Launch Application Window when Windows starts.

### ZENworks Tree

When installing Workstation Manager or Application Launcher a ZENworks Directory Tree can be specified. If entered the tree will be used for Workstation Manager and will be used for Application Launcher if the Limit Application Launcher checkbox is selected.

Limit Application Launcher to one tree only

Enter the ZENworks tree
